

Learning Through Objects: Museums and Young Children

March 24 and 25, 2009

The Smithsonian Early Enrichment Center is offering an innovative training program for museum professionals and early childhood educators interested in using objects to teach young children.

This two-day program will be offered at the Smithsonian Institution. Participants will learn how a host of museum objects - including paintings, sculptures, an African headrest, and an old-time chestnut roaster - can help children, as young as two or three, understand their world.

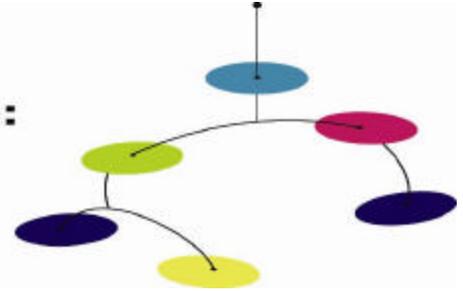

The program, featuring hands-on exercises with museum objects, lectures, discussions, and gallery experiences, is designed to help museum educators forge more creative encounters with young museum-goers, and to introduce early childhood educators to the magic of museums.

Participants will be encouraged to think expansively about using children's literature, art and objects to create explorations of thematic topics. By tapping resources in their own communities—resources such as objects in local museums and community centers, statues, public art, bridges, buildings, and more, participants learn to bring the world of museums to young children in their communities. All objects, even commonplace ones, tell stories. That's what "Learning through Objects" is all about.

- Cost:** \$300 Early registration before February 27
\$325 Late registration after February 27
- Location of Seminar:** Smithsonian Institution
Smithsonian Castle Library, Room 384
- Date:** March 24th and 25th
Time: 8:45 a.m. - 4:30 p.m.
- Transportation:** Smithsonian Metro Stop (Orange or Blue Line)
- For information:** Anna Forgeron, forgerona@si.edu
Phone: (202) 633-1399
Fax: (202) 786-3153
PO Box 37012 MRC 184
National Museum of Natural History
Washington, DC 20013-7012

A confirmation letter will be mailed to each participant. Space is limited.

Learning Through Objects: Museums and Young Children

Seminar Dates: March 24 and 25, 2009

The Smithsonian Early Enrichment Center is a pioneer in museum-based preschool education. Since 1988, SEEC has used museum objects to help children probe the world and all that is in it, to distinguish between real and pretend, and to discover and celebrate cultures other than their own.

That's the magic of museums. That's the magic of SEEC!
